

# Secure, Reliable and Cost Effective...

## What are Cloud Services?

Cloud services means services made available to users on demand via the internet from a provider's servers as opposed to being provided from a company's own on-premises servers.

## What are the Benefits of Minder Secure Cloud Services?

Minder Cloud Services will offer your business many benefits such as:

- > scalability, ability to increase or decrease server capabilities and quantities;
- > flexibility of connecting anywhere, anytime;
- > streamlining of IT cost structure;
- > improved communication and increases efficiency;
- > no hardware upgrade or replacement costs;
- > enterprise grade backup and disaster recovery with a fully redundant system
- > reduce business downtime and so much more...

## Are you ready to make the move?

# Minder Secure Cloud Services

## Product Specifications:

- > FlexPod Data Centre is an integrated computing, networking, and storage solution developed by Cisco and NetApp. The FlexPod configuration is a Cisco Validated Design that is used in many high end data centre solutions, and ensuring our Minder solution is of the highest standard.
- > The FlexPod architecture is completely scalable. It can be optimized for a variety of mixed workloads in virtualized environments, and can be increased or decreased as your needs change.
- > Minder offers a user pays service that can quickly scale up or down to match demand, so you only pay for what you use with a commitment to beat competitor prices for popular infrastructure services like vCPU, Memory and Storage meaning you're always getting exceptional value for money.
- > N + 1 Redundancy throughout our entire Minder infrastructure ensures that there are no single points of failure.
- > Designed for 99.99% availability means that downtime at the infrastructure level has been assessed to not exceed 4 minutes 23 seconds per month statistically. Since its launch 18 months ago Minder has had 100% up time.
- > Data Security, Privacy and Redundancy is our highest priority, protected by enterprise grade firewalls offering up to AES-256 Encryption, replicated data centres and geo-redundant data will ensure our clients' data remains secure.
- > Online threat protection can be offered via Minders range of cloud based anti-spam, anti-malware and Network Monitoring services that is manned by our NOC utilising enterprise grade network management tools such as Science Logic, that performs intrusion detection, denial-of-service (DDoS) attack prevention, and machine learning tools to help mitigate threats.
- > Minder offers a simple Service Level Agreement (SLA) to ensure both parties are clear on the deliverable outcomes.
