

PROACTIVE SERVER MONITORING

PROTECT YOUR BUSINESS AND MINIMISE DOWNTIME...

Usually, by the time you have worked out there is a problem with your server it is already too late, costing you time and money.

PROBLEMS ARE NOT NORMAL

At OAS Technology we believe it's better to be proactive. With Proactive Server Monitoring our team can identify and resolve issues on your server before you even know they exist.

“Before we even arrive in the office, server upgrades, software, and licenses are dealt with, installed and do not impact our team. Incremental backups are automated and done every 11 mins... We couldn't be happier. Proactive Server Monitoring has been very cost effective and reduced unplanned downtime.”

- Tabitha Tworek, Insight Advice

TAKE CONTROL

At OAS Technology we offer a Proactive Server Monitoring Service that will keep you ahead of potential setbacks. Efficient, automated systems and continual health checks help us quickly diagnose an issue, then fix it fast!

Proactive Server Monitoring is a management system for your entire IT infrastructure. By monitoring your servers remotely and around the clock, we are able to slash downtime and increase productivity. And because it can be customised, we have got a solution for businesses of all sizes.

FEATURES

24/7 Monitoring

We manage and monitor the health of your server equipment, keeping a close eye on potential hardware failure, system performance and critical server applications.

Technical Support

We provide FREE Level 1 technical support for servers protected by Proactive Server Monitoring.

Asset Tracking

Our asset and inventory management tools can perform automatic scans of your networks - all through our remote dashboard.

Comprehensive Reporting

You will have access to reports on your system's performance including anti-virus, backup, drive space, exchange and disk health and monthly reporting of historical data.

BENEFITS

Minimal Disruption

Remote access through our dashboard to your systems means issues are identified and often resolved unobtrusively and efficiently.

Regular Checks

Real time monitoring of servers and reporting back to us every 5-15 minutes, means we can identify issues before they become problems.

Quarterly Management Meetings

Communication is kept open with regular discussions about system health, capacity and future improvements.

Onsite Technical Support

This is available as an additional monthly options. Please speak with our sales team.
